State Comments:

Shelby Gravel, Inc. began its operation in 1978. On September 6, 1987 the office of Emergency Response received notification that there were burned tires and barrels at this site. A final incident report was filed indicating that there was an air release and spillage at the site. According to Mark Mauck of Emergency Response no actual spill occurred.

Apparently the fire began when Shelby Gravel was in the process of clearing brush and leveling ground. The bulldozer driver encountered a nest of bees in a brush pile and unaware that tires were also in the under brush lit a fire. The fire was eventually extinguished by a cover of dirt.

According to Greg Hebbe, Manager of Shelby Gravel, the tires were allowed to be dumped there by Russell Stott, the previous land owner. Shelby Gravel Inc. allows no dumping of any materials at this site. In addition, the gravel pit is not being filled with any waste materials of any type, including construction materials.

Since there is no indication that any hazardous materials were dumped at this site, the State recommends a No Further Remedial Action Planned (NFRAP) priority assessment.
